

## Faculty Information

### Sangho KIM

#### ■ Division:

Development Economics (DE)

#### ■ Research Area:

International Trade, Economic Growth, Economic Development, Productivity Analysis

#### ■ Research Methods:

Econometric Analysis, Quantitative Analysis

#### ■ Seminar Topic and Keywords:

Applied Econometrics, Quantitative Analysis, International Trade, Economic Growth, Economic Development

#### ■ Seminar Teaching Method:

Tutoring, Presentation, and Discussion

#### ■ Possible Research Topics for Students:

Economic topics that apply various econometric analysis including micro econometric analysis and panel data model

#### ■ Comments:

My seminar must take my Special Studies (Development Economics) course in Fall semester in which I teach an introduction to econometrics. The course includes not only basic principles of the subject but Stata programming for application. Students can learn the basic regression technique that helps graduation research.
